Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-5, in Paper No. 6 is acknowledged.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "corners of said bag and terminal end of the side walls" forming a laterally extending portion from the bottom wall (claim 4) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 3 and 4, "the corners of said bag" lack antecedence.

Art Unit: 3727

Claim 4 contradicts the claim from which it depends. Claim 4 requires "the corners of said bag" forming a laterally extending portion with the terminal end of the side walls. However, claim 3 requires "relieving the corners of said bag, said corners being removed".

In claim 5, "said end walls" lack antecedence.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Pannenbecker.

Pannenbecker discloses a plastic bag comprising a sleeve having an open top, a closed bottom, a pair of opposing frontal faces and a pair of opposing side walls each provided with a pair of gussets and two handles formed integrally and unitarily with frontal faces. Furthermore, the flexible nature of the Pannenbecker bag inherently allows it to provide a wide mouth and flat bottom.

Art Unit: 3727

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pannenbecker in view of Benoit and Clayton et al.

Pannenbecker discloses the claimed device except for the intersection of the bottom and side walls being removed along a tapered line (or provided with angular cuts). Benoit discloses that it is known in the art to remove the intersection of the bottom and side walls along a tapered line or to provide an angular cut at the intersection of an analogous bag. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the intersection of the bottom and side walls of Pannenbecker with the angular cuts of Benoit, in order to provide a flat bottom wall.

Pannenbecker and Benoit disclose the claimed device, as discussed above, except for the bottom being reinforced with ribs. Clayton et al. discloses that it is known in the art to provide ribs in the bottom of a plastic bag. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the bottom of Pannenbecker with the ribs of Clayton et al., in order to strengthen the bag.
